

SAFETY PROTOCOLS

Keeping our facility safe for our staff, students & families.

CLEANING AND SANITIZING

Hand washing and sanitizing required upon entry to the facility. Additional hand sanitizing stations have been added.

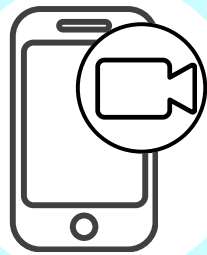

Facility and surfaces have been professionally cleaned, disinfected, and protected against COVID-19. Mats, equipment, and floors will be disinfected between rotations and classes.

SOCIAL DISTANCING

Class sizes have been reduced to maximize space and maintain social distancing guidelines.

Floor markings have been added to gym and dance rooms to designate areas to stand, and direction on and off equipment.

LOBBY & CLASS VIEWING

Lobby and waiting room will not be open for viewing class. Parents will be able to observe all classes via closed circuit streaming through cameras in the gym and both dance rooms. You may enter the office after classes begin to conduct necessary business. One parent per Preschool & Toddler student will be able to escort their child into the facility as necessary.

HEALTH + SCREENING

Temperature check will be required for all students upon entering the facility.

Students who feel unwell must refrain from class until they are feeling well. Classes can be made up at earliest convenience.

FACEMASKS

Masks must always be worn in the common area. It is not always safe for the students to be wearing a mask while performing skills. The risk of injury is great if vision is impaired and as such we do not always require the students to wear masks while performing skills. However, we do require masks while moving through the facility or when within 6 feet of other students.
